

Android (Policy enforcement rules)

Android 10 introduced a new enforcement mechanism for system-wide policies, known as Android Device Policy (ADP). This mechanism allows administrators to enforce various policies across the entire device, including:

- Lock screen timeout
- Screen timeout
- Keyguard disabled
- Screen rotation
- Screen brightness

ADP policies are enforced through the `android.os.enforcement` framework. For example, the `android.os.enforcement` framework (Android Device Policy) enforces the `android.os.enforcement` framework.

The `android.os.enforcement` framework enforces the `android.os.enforcement` framework.

ADP

ADP policies are enforced through the `android.os.enforcement` framework.

ADP policies are enforced through the `android.os.enforcement` framework.

ADP

ADP policies are enforced through the `android.os.enforcement` framework.

ADP policies are enforced through the `android.os.enforcement` framework.

ADP

ADP policies are enforced through the `android.os.enforcement` framework.

ADP policies are enforced through the `android.os.enforcement` framework.
