

# Personal usage

When [provisioning a company-owned device for work and personal use](#), you can specify some rules to limit how the user can operate the device for personal usage, outside the work profile.

This section only apply to company-owned devices with work profile. They will have no effect on fully managed or personally-owned devices.

## 1. Camera disabled

Whether camera is disabled.

## 2. Screen capture disabled

Whether screen capture is disabled.

## 3. Max days with work off

Controls how long the work profile can stay off.

## 4. Bluetooth sharing

Controls whether bluetooth sharing is allowed in the personal profile of a company-owned device with a work profile.

## 5. Private space

Controls whether a private space is allowed on the device.

## 6. Play Store mode

This mode controls which apps are allowed or blocked to the user in the personal profile's Play Store.

**Blocklist (default):** All apps are available and any app that should not be on the device should be explicitly marked as **Blocked** in the **Applications** section.

**Allowlist:** Only apps explicitly specified in the **Applications** section with **Install type** set to **Available** are allowed to be installed in the personal profile.

## 7. Applications

List of applications that must be allowed or blocked on the personal profile. The behavior of the list's content depends on the value set on **Play Store mode**.

To add a new app from Play Store, click on the + icon.

### 7.1. Install type

Types of installation behaviors a personal profile application can have.

**Blocked:** The app is blocked and can't be installed in the personal profile.

**Available:** The app is available to install in the personal profile.

## 8. Blocked account types

Account types that can't be managed by the user. This option prevent device users from adding unapproved accounts on their personal profile.
